INTRODUCTION

Projects are a part of everyday life. In a fast growing economy like India projects assume even greater relevance with infrastructure being set up rapidly to ensure that momentum of economic growth is maintained. Besides, industry also needs to take up projects to keep pace with the growing economy.

Companies need to select the most appropriate project from a given set of prospective projects. For the selected project there are numerous tasks involved which need to be planned, scheduled and monitored for successful completion of the project. Managing projects, therefore, becomes a challenging task. Time and cost over runs are a major challenge for many companies. Project Management is a focused approach to managing projects which helps in achieving the targets of timely completion, cost within budget and conformance to specifications. The Project Manager not only requires project skills, he also needs to have adequate financial skills to successfully contribute to the corporate objectives.

CONTENTS

The two-day programme has the following to offer:

- Introduction to Project Management and its relevance
- Project life cycle concepts
- Stakeholder management
- Project scheduling using networks
- Project crashing
- Project evaluation and control
- Understanding Financial Terms – linking project performance with the company's performance

PEDAGOGY

Pedagogy followed will be a combination of lectures for learning of concepts and problem solving to illustrate application of conceptual learning to practical situations.
